

# OWASP Kerala x µLearn Bootcamp — Task 2

---

**Task:** Google Dorking Investigation

**Objective:** Use Google Dorks to find publicly exposed files or directories from a target domain.

---

## Google Dorks Used:

1.

**Dork:** site:tesla.com filetype:xlsx

**Purpose:** Search for publicly available Excel files on Tesla's domain.

**Result:**

- **URL:**  
[https://www.tesla.com/sites/default/files/CLAIM\\_FORM\\_DEALER\\_EN\\_foam\\_detachment\\_Model\\_3.xlsx](https://www.tesla.com/sites/default/files/CLAIM_FORM_DEALER_EN_foam_detachment_Model_3.xlsx)
  - **Description:** A claim form used by Tesla dealerships regarding foam detachment issues in the Model 3. While not sensitive in terms of security, it provides insight into internal service workflows and product issues.
-
