

TASK 2

Using Google Dorks to Find Publicly Exposed Documents or Directories

Submitted by: Christina Babu

TASK: GOOGLE DORKING ON TATA MOTORS

Google Dorking is an Open-Source Intelligence (OSINT) technique used to locate publicly available data indexed by Google. This report demonstrates a Google Dork search conducted on the toyotabharat.com domain to uncover a publicly accessible sustainability report.

1. Publicly Accessible Environmental Report

Google Dork Used: site: tatamotors.com filetype:pdf intitle:"growing responsibly "

Objective: Identify publicly available growing responsibly reports in PDF format hosted on tata official Indian domain.

site: tatamotors.com:Restricts results to Tatta India's website.

filetype:pdf :Displays only PDF documents.

intitle: "Growing responsibly" :Searches for documents with the phrase " Growing responsibly " in the title.

From the search results, the Growing responsibly (Concise English) 2023 was selected.  Access the report here

2. Analysis of the Document

Content: This file is the official Growing responsibly published by Tatta motors for 2022–2023. It's part of Tata Motors' regulatory and transparency obligations, designed for shareholders, stakeholders, analysts, and the public.

Availability: The Tata Motors Integrated Annual Report 2023–24 outlines the company's financial and sustainability performance across all business segments.

Insights: Tata Motors plans to split into two listed entities—one focused on Commercial Vehicles (CV) and another on Passenger Vehicles (PV), Electric Vehicles (EV), and Jaguar Land Rover (JLR)..

Summary

Tata Motors' 79th Integrated Annual Report details strong financial performance and major strategic shifts. The company posted its highest-ever revenue of ₹4.37 lakh crore and a 11x jump in profit after tax to ₹31,807 crore. With 73,844 EVs sold and a 70% EV market share in India, the report reflects Tata Motors' industry leadership in electrification..
