

Google Dork Discovery Report

Discovery Summary

- **Google Dork Used:**
`site:hackerone.com filetype:pdf confidential`
 - **Purpose of Dork:**
This query was intended to search for PDF files hosted on HackerOne's domain that may contain the word "**confidential**", which might indicate potentially sensitive or internal-use content.
-

File Identified

- **File Title:**
HackerOne Code Security Audit Report - SAMPLE
 - **Direct Link:**
<https://www.hackerone.com/sites/default/files/2025-02/HackerOne-Code-Security-Audit-Report-SAMPLE.pdf>
 - **File Type:**
PDF
-

Sensitivity Assessment

- The document **contains the word "confidential"**, suggesting it was intended for internal or limited distribution.
 - Even though the filename includes "SAMPLE," such files are often used in security audits, assessments, or reports — which may outline **technical details, security methodologies, or findings**.
 - If not meant for public access, its exposure via Google search could be considered a **security oversight or misconfiguration**.
-
