

# TryHackMe: Lo-fi Beats – Write-up

Author: Aswana Ashok

Room Name: Lo-fi Beats

Platform: [TryHackMe](https://tryhackme.com/room/lofi)

Difficulty: Beginner

What is this room about?

Lo-fi Beats is a fun and simple CTF room on TryHackMe. The goal is to explore a website, look carefully, and find the hidden flag. No tools or commands are needed — just your browser and some curiosity!

What I did

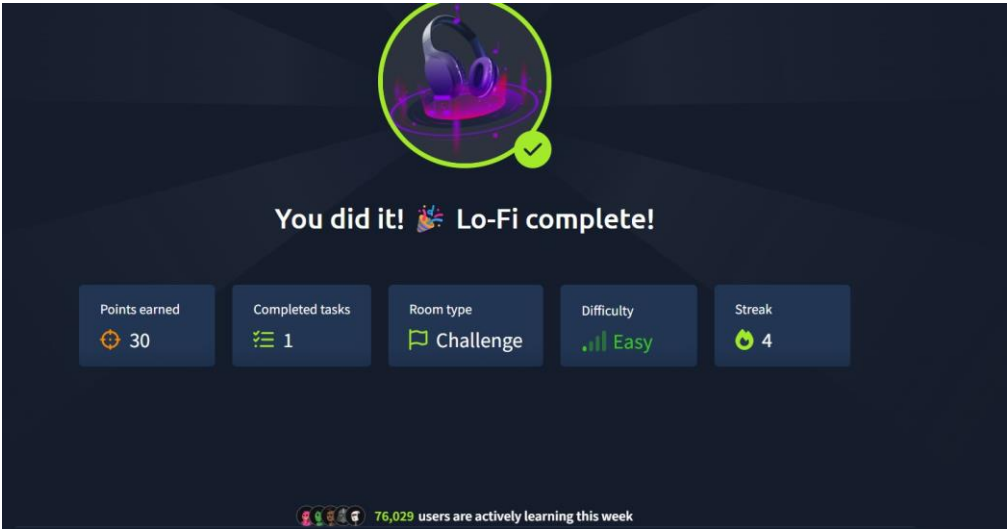

1. Opened the IP address in my browser.
2. Looked around the Lo-fi themed website.
3. Used Inspect Element to explore the code and hidden parts of the site.
4. Found something interesting (like a hidden message or link).
5. Made a small change or clicked something.
6. 🎉 Found the flag and copied it!

🚩 Flag

Yes! I found the flag successfully ✅

What I learned

- You don't always need tools — just observation.
- Checking the page source or using inspect element can help find hidden things.
- Small details on a website can lead to big clues.
