Google Dorking Report

This report analyzes the results and potential implications of a specific Google dorking query targeting the rajagiritech.ac.in domain.

1. Query Details

- **Query String:** "B tech" site:rajagiritech.ac.in filetype:pdf
- **Date of Query:** July 26, 2024

2. Query Analysis

The query is constructed with three specific operators to narrow down the search results:
- **"B tech":** This searches for the exact phrase "B tech". This is a common term for the Bachelor of Technology degree program.
- **site:rajagiritech.ac.in:** This operator restricts all search results to the specified domain and its subdomains. In this case, it only shows results from the Rajagiri School of Engineering & Technology website.
- **filetype:pdf:** This filters the results to only show files with the .pdf extension.

Combined Effect: The query is designed to find any publicly indexed PDF document on the rajagiritech.ac.in website that contains the exact phrase "B tech".

3. Summary of Findings

The query proved highly effective in locating multiple instances of sensitive information. Key findings include publicly accessible PDF documents containing lists of candidates admitted for B.Tech programs.
- Evidence (Proof-of-Concept Link): The following link is one example of an exposed document, leading directly to a list of admitted students: https://www.rajagiritech.ac.in/stud/KTU/AQAR/uploads/678e8cefaa4c7_2.1.2_supporting.pdf
- **Additional Findings:** Further investigation with the same query revealed other, even more sensitive documents. Due to the nature of this data, specific details and links are intentionally omitted from this report. This indicates a systemic issue rather than an isolated incident.
